

cutting and engraving

Never before has such a diverse array of machining processes and applied media been available to customers seeking that truly unique sign solution. This added dimension comes courtesy of a powerful combination of continual technical investment and a relentless drive for innovation that bears testimony to our output.

CUTTING AND ENGRAVING... at a glance:

CNC machining: Fast, and 100% accurate automated output. ◀

Laser engraving: Profile cutting of intricate detail and high resolution engraving onto most non-metal materials. ▶

Form cutting to create stainless steel built-up lettering. ▶

Resin doming: A niche application that transforms materials via a transparent liquid 'bubble.' ▶

Stainless steel plaques and signs using traditional CNC engraving or laser. ▶

TYPICAL APPLICATIONS:

Profile-cut and built-up lettering and logos created from substrates such as aluminium or perspex. Bespoke awards, engraved plaques and historical notices, using materials such as corian, ceramics, woods, laminates, and many more...

...Put your ideas into Action

Here are just a few examples of cutting and engraving projects that we have produced for a wide range of customers.
